Re: *Ex Parte* Communication
MB Docket Nos. 07-29, 98-120 and CSR-7108

FILED/ACCEPTED
 SEP - 7 2007
 Federal Communications Commission
 Office of the Secretary

Dear Ms. Dortch:

On behalf of RCN Telecom Services, Inc. ("RCN") and Surewest Communications ("Surewest"), and pursuant to Section 1.1206 of the Commission's Rules, 47 C.F.R. § 1.1206, this is to provide notice of an *ex parte* meeting held on September 6, 2007. The meeting was attended by Mr. Peter D. Aquino, RCN's Chief Executive Officer, Mr. Richard Ramlall, RCN's Senior Vice President, Strategic, External and Regulatory Affairs, Ms. Lynne Buening, RCN's Vice President, Programming, Ms. Amy R. Mehlman of Mehlman Capitol Strategies, Inc., and the undersigned (the "RCN Participants"), and Mr. Jack Day, Manager, External Relations, Surewest (together, the "RCN/Surewest Participants"). The RCN/Surewest Participants met with Commissioner Deborah Taylor Tate and Ms. Amy Blankenship, Legal Advisor to Commissioner Tate (the "FCC Participants"). The purpose of this meeting was to discuss some of the points raised in RCN's and/or Surewest's comments filed in MB Docket No. 07-29 (Program Access Extension), MB Docket No. 98-120 (Dual Carriage), and CSR-7108 (America Channel).

In addition to discussing other matters addressed in their comments in MB Docket No. 07-29, the RCN/Surewest Participants discussed their position that program access complaints should be resolved in an expedited manner and with discovery rights that are both adequate for complainants to be able to prove their case as to discriminatory conduct and appropriately provide for confidentiality of

information consistent with the Commission's protective order procedures. The RCN/Surewest Participants also stated that a 90-day deadline for resolution of program access exclusivity and discrimination disputes would appropriately reflect Section 628's admonition that program access complaints should be resolved expeditiously. The RCN/Surewest Participants noted that a 90-day procedure is consistent with the Commission's similar time frames adopted in connection with the Adelphia decision in MB Docket No. 05-192, and in relation to the Section 271 dispute resolution process. They also discussed the need for additional program access protections to prohibit anticompetitive exclusive agreements for non-duplicable 'must have' third party programming.

The RCN Participants also addressed questions about the RCN's position on dual must-carry carriage requirements that are proposed in MB Docket No. 98-120. In response, they stated that the marketplace and not government mandate should dictate whether a cable operator devotes valuable additional capacity to transmit broadcast channels in two formats. For example, RCN currently carries 10-15 must carry stations in each market. If there is a dual must carry obligation, this would mean that 60-90 MHz of additional analog spectrum would have to be dedicated to broadcast stations that are also being carried by RCN in digital format. This significant capacity would therefore be rendered unavailable for RCN's business purposes, such as additional *a la carte* offerings similar to RCN's popular Hispanic "Mi Vision" *a la carte* service, additional high definition (HD) programming, additional video-on-demand (VOD) options, higher capacity broadband services, and the like.

Even assuming that the must carry stations would bear the cost of the "down-conversion" of their digital signals to analog format (which should clearly be the case), a dual carriage obligation would be financially onerous in the case of new competitive entrants whose cost structures and margins are such that the foregone revenue from the considerable spectrum required to make two separate streams of carriage for each must carry station would impose significant financial hardship and therefore impair their ability to compete.

Should the Commission nevertheless decide to afford must carry broadcast stations the opportunity for dual carriage on cable systems, such a requirement should be limited to a transition period of no more than 2 years and should be carefully targeted and limited to addressing only the ability for subscribers to view the channel. Accordingly, a cable operator should not be required to devote spectrum to analog carriage if all of its subscriber households have digital service and can therefore view a must carry station's digital signal. Moreover, an essential aspect of any dual carriage obligation is that an operator must have

discretion to determine the channel position of the analog channel. This is necessary in order for spectrum efficiently purposes so that an operator can group analog channels together.

In connection with CSR-7108, the RCN Participants provided a copy of the attached document showing the extensive list of NCAA colleges and universities that will be carried on the America Channel.

Should any additional information be required with respect to this *ex parte* notice, please do not hesitate to contact me.

Very truly yours,

Jean L. Kiddoo
